

Summer Program UPDATE 2017

GRADUATION!

This year we are thrilled to celebrate the University Graduations of five of our wonderful scholarship students! We are so proud of all their hard work. And we can hardly wait to see what they do next.

- Abenezer:** BA - Chinese Language (Alemgena)
- Dimetros:** BA - Computer Science (Gullele)
- Fraol:** BSC - Construction Technology Management (Alemgena)
- Frehiwot:** BSC - Nursing (Gullele)
- Sinidu:** Doctorate of Medicine (Gondar)
Sinidu is our first Doctoral Graduate!

Summertime has brought with it a myriad of events, the most exciting for us are the incoming reports of how our students fared on their exams, and what they plan to do next year.

Every year we are so proud to see the vast majority of our students advance to the next grade level, and become even more involved in their student clubs at the education center, expanding their knowledge and exploring their interests.

MEDICAL CARE

Canadian Humanitarian was very pleased to host 18 nurses and 4 physicians from Alberta in our first two expeditions of 2017. As a result, all 10 of our Ethiopia projects were visited, and students each received medical examinations.

A vital part of Canadian Humanitarian's program all year round, volunteers had the chance to participate with project managers in visiting homes of students.

HOME VISITS

This is a wonderful opportunity to see the challenges and strengths that student families have, and personally thank them for all they do for each child.

Canadian Humanitarian volunteers have completed **over 60 home visits** to student homes so far this year.

NEW STUDENTS NEEDING SPONSORSHIP!

As our older students move onwards to post-secondary training in the scholarship program, new children come into the program to fill the opening they leave behind.

We expect that **40 new students** will join our programs this fall. Help us find sponsors to match to our new students!

SECURE.CANADIANHUMANITARIAN.COM/SPONSOR

For only \$35 per month you can help a young person receive an education and permanently leave a life of poverty behind. Not only is the student changed, but so is their family, and their community!

COLOUR TOSS IN ETHIOPIA & CANADA

As part of our spring volunteer expedition group, a fitness fair was held for all students from every program and education center. To finish the fair, we held a **group colour toss** - with powdered colour brought from North America. They had never done this before! Some students were afraid at first, but once they realized it washed off easily (it was made from cornstarch and baking soda) they became enthusiastic and we had a wonderful time tossing colour on each other.

In Canada we were able to raise **\$37,000** for the programs these students attend by holding **three Hues for Humanity Events** (Fort McMurray, Winnipeg and Medicine Hat).

Annually, our education centers need some painting, or repair to keep the environment bright, clean, and safe for all who use it.

REPAIR WORK

Thanks to great volunteers, we were able to paint the main hall of the Gindo Center, and some of the dome classrooms at the Kersa Center.

To all you who have sponsored students and made donations

THANK YOU!

your generosity makes our programs possible!
